EDUCATION

- **Visvesvaraya National Institute of Technology** Nagpur, India
Bachelor of Technology in Computer Science & Engineering; CGPA: 7.06/10.0 July 2011 – May 2015
- **Somalwar Junior College Ramdaspath** Nagpur, India
Higher Secondary School Certificate; Percentage: 90.17% 2011
- **St. Francis De'Sales High School** Nagpur, India
Secondary School Certificate; Percentage: 91.23% 2009

PROGRAMMING SKILLS

- **Languages:** Java, C/C++, Javascript, HTML/CSS
- **Frameworks:** Spring MVC, Spring Boot, Vert.x
- **Databases/Technology:** Cassandra, Aerospike, Elasticsearch, MongoDB, MySQL, Kafka

EXPERIENCE

- **MakeMyTrip** Bengaluru, India
Principal Software Engineer (Platform Growth Team) January 2025 - Present
 - **Apollo (Client Backend of MMT Myra/Gia Bot):** Spearheaded the evolution and scalability of the backend system for MMT's Myra/Gia Bot Framework.
 - Led the re-architecture of the Apollo service to leverage WebSockets for enhanced real-time chat, ensuring robust socket stability and efficiently managing a growing daily volume of over 50,000 user messages.
 - Drove the integration with MMT's Generative AI framework and other key MMT services, while implementing a seamless handoff to human agents when bot interactions required escalation, thereby improving overall user support.
 - Enhanced user engagement by introducing template support for rich media card responses and enabled advanced features like conversation bookmarking, response streaming, and service-specific custom configurations.
 - Established Apollo as a core platform, empowering diverse MMT services to readily integrate and deploy bot functionalities, significantly expanding intelligent automation across the company.
 - Continuing to Architect Scalable Services, Mentor Junior Engineers, and Drive Excellence in Design & Code Reviews
- **MakeMyTrip** Bengaluru, India
Lead Software Engineer (Platform Growth Team) January 2023 - Present
 - **Apollo:** Backend System for powering Bot Framework UI of MMT
 - Designed and developed the service having User-LLM Bot Chat over HTTP SSE
 - Persistence Layer for chats history and Intergration with the MMT LLM Intelligence System and also acting as UI backend
 - **Agora:** Generic System for Activity Feed Functionality
 - Led the Design & Development of Service and Onboarded goContacts program
 - Architecting Services, Mentoring Juniors and Reviewing Designs & Code
- **MakeMyTrip** Bengaluru, India
Senior Software Engineer II (Platform Loyalty Team) March 2021 - January 2023
 - **Loyalty System:** System for powering Loyalty Programs of Goibibo (goTribe) and MakeMyTrip (MMTBBLACK)
 - Designed and developed features like membership extension, oneclick enrolment, extending functionalities to B2B customers (MyPartner Loyalty Program)
 - Migrated from existing drools rule engine to in-house rule engine, Enabled Vertx Hazelcast Clustering on ECS
 - Improved System stability and worked on other backend tasks

- **Snapdeal**

Senior Software Engineer

Bengaluru, India

April 2019 - Mar 2021

- **Distributed State Machine:** System which acts as an orchestrator for order state transitions across other systems. Reduced Seller Payments Settlement time by migrating existing Seller Payments process to DSM
- **IVRS:** System for IVR communication. Integrated with new Vendor, Refactored Code for providing option to select vendor for IVR templates
- **Vernac Service:** Designed and Developed Snapdeal Vernac System which gives translations for the product data
- Added support for experiments to capture data for improving company metrics and part of Seller Team for short time worked on backend tasks to improve functionalities of Seller panel

Software Engineer II

April 2017 - March 2019

- **Reviews and Rating:** Added Review Tags Functionality, also added support for A/B testing to API's
- **NPS:** System for capturing NPS score by sending email, notifications. Involved in feature additions which enabled capturing more data and worked on changes to reduce reporting issues
- Worked on backend tasks which improved system stability and Migrated Systems from Public cloud to Company's Private cloud

Software Engineer I (User Generated Content Team)

July 2015 - March 2017

- **Reviews and Rating:** System for powering Product R&R, Image Reviews, Reviews Moderation Panel, Data Syncing/Cleaning Utilities
 - Developed Framework for removing non Buyer reviews, fraud ratings to increase the trust of R&R content
 - Involved in implementing image review, attribute level rating features backend and also on Android app
- **Question and Answer:** System for powering Product Q&A, Q&A Moderation Panel, Moderation Framework
 - Implemented new features on Moderation Panel which improved productivity of Moderators
 - Developed Framework for moderating content based on keywords which helped in automating moderation of some content
- Worked extensively on backend tasks such as developing and optimising REST API's, Bug fixing
- Improved caching strategy to reduce memory usage, developed cache warm-up utility
